

Affordable for all businesses,  
both small and large.

Only  
**\$10**  
per month  
per active employee

**No Setup Fees**  
**No Upgrade Fees**  
**NO CONTRACT**

Labor Sync charges you by the number of employees whose time was **tracked** during a billing cycle, not by the number of employees you have within the system. If you do not track an employee during a billing cycle, **the bill will be automatically reduced.**

## How much could you be saving?

A 15-minute discrepancy per person, daily, could cost your company thousands on over paid wages!

**\$20**

Hourly Wage

**15**

Employees

**\$19,500**  
Annual Savings

 **LABOR SYNC**® v 2.8

## WHAT IS LABOR SYNC?

Labor Sync is a Labor Management Solution that utilizes GPS on mobile devices to provide employers with real-time updates of employee time and location while streamlining the payroll process.

From any wireless device or computer, the Labor Sync account manager provides interactive maps to see where employees were throughout the day; a messaging feature that integrates with navigational software, phone and e-mail attachments; and a full suite of reporting tools that simplify payroll and job order costing.

The Labor Sync app, available for both Android and iOS devices, uses GPS to track employees current activity and location. This information is updated in real-time and minimizes discrepancies, saving your company time and money.

**Time is Money...**  
**We Save You Both.®**

## FEATURES & BENEFITS

### Custom Reports

Improved system to help you generate reports to fit your specific requirements.

Show or hide details for various report types.
